PROFILE

Current student at **Stockholm University**, currently working towards a **Bachelor's degree in Interaction Design**. I am a driven, creative and business minded person who enjoys learning new digital tools. I want to master the craft of designing digitally and stay up to date with new tools as they become available. I have done UX/UI work both in university courses but also in the real world, proving my ability to communicate well with stakeholders, and proving my skills and taste as a designer. However, I still have much to learn.

I am currently looking for opportunities for unpaid internships starting 2027 in Stockholm, where I get to do real work and learn from professionals.
